

INNOSELL: YOUR CONSULTANT

You know all about your collection. The materials, sizes, and precautions that need to be taken. Furthermore you know your collection is priceless. So you only want the best to preserve or display it all. Innosell knows exactly all about that. The possibilities, the latest techniques, the ideal systems for your collection. Let Innosell advise you about the best solutions for your collection. Then everything will remain in top condition

"Thinking along with us about new products and solutions and keeping appointments, those are matters we find extremely important, and we are convinced you share this opinion."

Wim Hoeben,
Head of Physical Collection Management
Rijksmuseum Amsterdam

TOTAL CONCEPTS

Because Innosell is specialised in packaging materials, packaging concepts, painting hanging systems and storage systems, there is ample expert knowledge within the organisation. This expert knowledge manifests itself in the development of total concepts for storage systems, for instance. Often it does not stop at a vibration-low painting rack, a moveable cabinet or an air-conditioned glass cabinet. You want it all to match. Your collection deserves the best made-to-measure work there is. Innosell has developed such a total concept for you, so that top quality is guaranteed. Needless to say that innovation is one of Innosell's most important motives.

Innosell continually improves its products, such as a new floor and ceiling guide system for painting racks or fold-out platforms with screens or vibration dampers for paintings.

KNOWLEDGE, QUALITY, SERVICE

For years Innosell has been cooperating with the leading museums at home and abroad. This helped us to collect a vast amount of specialist knowledge, which we apply to future projects. The reason why so many museums choose Innosell is the top quality of the products and their innovative solutions. Besides this lead in quality, the high level of service offered is also a matter of great importance. It only takes one phone call and Innosell is at your service.

The Innosell organisation works in an environmentally friendly way. All materials have a long life and are recyclable afterwards. The ISO standards with respect to preservation are Innosell's guide in all its activities. Some unique selling points for the Magista storage systems are: welded yokes, welded sub-carriages, 100% extractable drawers, direct transmission in moveable cabinets and telescopic guides in massive ball bearings.

STORAGE/TRANSPORT

Storing, packing and transporting valuable and vulnerable artefacts is a delicate matter. Innosell has years of experience in solving these issues for museums. Acid-free packaging material, conditioned storage systems... whatever you need: Innosell will take care of it. The quality of top brands such as Museum Art Foam, Magista and Takiya make Innosell ready for every challenge.

PAINTING HANGINGSYSTEM

You want your artefacts to be hung as safely and aesthetically sound as possible. The high level of quality, the extensive quality tests and built-in securities of the Koreder Line system by Takiya guarantee that Innosell can take care of this without any problems. Your choice of colour and inclusive of mounting, upon your request.

Museum Quality Products
